

Summary

I am a Junior Developer seeking a Junior level Software Development role. Skilled in Full-Stack Development with a focus on Backend and Cloud Technologies. Proficient in C#, .NET, Node.JS and SQL. Strong communicator, collaborative team player, and adaptable problem solver with work and real-world project experience and a commitment to clean, maintainable code.

Work Experience

Junior Software Developer	Thoughtware Sandton / South Africa	November 2025 – Present
• Built and maintained scalable C# ASP.NET Web API services and developed cross-platform applications using Blazor and Blazor Hybrid. • Engineered agentic AI features within a Recruitment System, improving CV screening efficiency by 15%. • Developed a CV Analyzer, CV Builder, and AI-powered Cover Letter Generator to automate candidate application workflows. • Contributed to a large-scale Logistics Platform covering fleet, warehouse, and inventory management. • Implemented route optimization algorithms to solve Vehicle Routing Problems (VRP), improving fleet planning efficiency.		
Computer Science Tutor	Varsity College Sandton / South Africa	March 2025 – December 2025
• Provided one-on-one support in Java, Kotlin, and Cloud Technologies, helping students grasp core concepts in logic, testing, and mobile development. Simplified complex topics and improved learner outcomes through tailored guidance and practical feedback.		

Skills, Technologies and Languages

- **Languages:** Java, C#, Kotlin, JavaScript, SQL, TypeScript
- **Technologies / Tools:** MySQL, Oracle, SQL Server, MongoDB, PL/SQL, Microsoft Azure, Git, GitHub, Fork, Docker, Figma
- **Frameworks & Libraries:** ASP.NET, ADO.NET, Web API, Blazor, Express, React, Node.JS, HTML, CSS

Education and Certifications

- | | |
|---|--------------------|
| • Bachelor of Computer Science in Application Development , Varsity College. | 2023 – 2025 |
| ◦ GPA 3.96 | 2018 – 2022 |
| • Matric Bachelors Pass , Edenglen High School. | |

Projects

- **Budget Bunny – Expense Tracker (Kotlin, Android)** - Built a mobile budgeting app in Kotlin with category tracking, PDF exports, and budget tips. Visualised spending trends and helped users boost savings by up to 15%.
- **Nestify (TypeScript, Node.JS, React, Supabase)** – Developed a full-stack property management system with REST APIs, authentication, tenant and property tracking, and financial reporting. Designed scalable backend services in Node.js and integrated Supabase for real-time data storage and management.
