

Summary

I am a Junior Developer seeking a Junior level Software Development role. Skilled in Full-Stack Development with a focus on Backend and Cloud Technologies. Proficient in C#, .NET, Node.JS and SQL. Strong communicator, collaborative team player, and adaptable problem solver with work and real-world project experience and a commitment to clean, maintainable code.

Work Experience

Junior Software Developer	Thoughtware	November 2025 – March 2026
----------------------------------	--------------------	-----------------------------------

Sandton / South Africa

- Built and maintained scalable C# ASP.NET Web API services and developed cross-platform applications using Blazor and Blazor Hybrid.
- Engineered agentic AI features within a Recruitment System, improving CV screening efficiency by 15%.
- Developed a CV Analyzer, CV Builder, and AI-powered Cover Letter Generator to automate candidate application workflows.
- Contributed to a large-scale Logistics Platform covering fleet, warehouse, and inventory management.
- Implemented route optimization algorithms to solve Vehicle Routing Problems (VRP), improving fleet planning efficiency.

Computer Science Tutor	Varsity College	March 2025 – December 2025
-------------------------------	------------------------	-----------------------------------

Sandton / South Africa

- Provided one-on-one support in Java, Kotlin, and Cloud Technologies, helping students grasp core concepts in logic, testing, and mobile development. Simplified complex topics and improved learner outcomes through tailored guidance and practical feedback.
